Sayat Kalnazar

R&D Software Engineer & Doctoral Researcher with deep expertise in researching, designing, and developing secure communication software with guaranteed integrity and tamper-resistance. Experienced in building reliable, maintainable systems across full-stack and backend architectures using Java and Spring Boot. Combines strong adherence to clean code, OOP, and SOLID principles with advanced academic training in Software Engineering, IT, and a Ph.D. in Cryptology.

EDUCATION

L.N. Gumilyov Eurasian National University

PhD in Cryptology — Expected 2029

- Research topic: Research and Development of Post-Quantum Privacy-Preserving Credentials for Digital Identity Wallets

International Information Technology University

Master of Software Engineering - 3.43 GPA — July 2025

- Master's thesis: Development of a Smart Map for Planning and Evaluating the Efficiency of Urban Infrastructure Based on Human Activity Analysis Models in Urban Environment;
- Analysed population density in Almaty using securely encrypted mobile-network data shared through collaboration with a telecommunications company; protected data with AES, a NIST encryption standard;
- Received a high academic scholarship for excellent academic performanc

Astana IT University

Bachelor of Software Engineering - 3.2 GPA — June 2023

- Awarded a Certificate of Appreciation by the Rector of Astana IT University for contribution to the Student Government and student life;
- Received a high academic scholarship for excellent academic performance;
- Volunteered in organizing the annual international Digital Bridge event; in addition, contributed to the development of the event website.

WORK EXPERIENCE

Scientific & Technological center

Software Engineer & Researcher — January 2024 - Present

- Develop and research software related to secure communication systems;
- Apply software architecture design, clean code practices;
- Contribute to technical research and development in a scientific and technological environment.

Astana IT University

Practice Teacher, Software Design Patterns — September 2023 - December 2023

- Taught practical classes on Software Design Patterns for six groups of approximately 20 students each;
- Explained object-oriented design principles, common design patterns, and their practical application;
- Supported students with programming assignments and technical problem-solving.

General Educational Center

English Teacher — Februray 2023 - April 2023

- Delivered General English lessons for children aged 7-10 at A1-A2 levels;
- Designed interactive lessons covering core vocabulary, grammar, and oral skills.

AG Tech

Front-end Developer May 2022 - Jun 2022

- Contributed to the front-end development of real-world projects by implementing features and enhancements using the Angular framework.
- Demonstrated quick learning and adaptability in a professional tech environment, earning acknowledgment for my development contributions within a brief tenure

SKILLS

- Building secure systems
- Java
- Spring Boot
- Docker
- Kafka
- Microservices
- JSON, gRPC
- Research Skills
